

FAQ's

What kind of results should I expect?

Everyone can expect some collagen tightening. Many patients have seen:

- Brighter looking eyes
- Smoother, tighter skin around the eyes
- Reduced under eye sagging
- Softening of wrinkles and fine lines
- Smoother skin on the eyelids

How does it work?

As you age, the collagen in your skin breaks down resulting in wrinkles and sagging skin. Thermage uses patented radiofrequency (RF) technology to safely heat the layers of your skin, stimulating existing collagen and promoting new collagen growth for younger looking skin.

How long will the results last?

The effects continue to improve for up to six months following a single treatment. Results can last for years depending on your skin condition and natural aging process.

How long before I can return to my normal activities?

There's no special care needed after the procedure and most patients return to their regular activities immediately following treatment.

Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities.

Learn More About the Thermage Eyes procedure

Talk to your doctor about Thermage, and discover how fast and easy it is to have the younger looking eyes you've been wishing for.

“ I was definitely not expecting to see results like this...everything that has occurred since the treatment is really a plus. ”

“ My eyes are looking brighter... not as tired looking. ”

“ Because of Thermage, I can wear eyeshadow again. ”

Give a lift to Tired Looking Eyes

The Thermage® Eye Procedure is the only procedure that helps smooth and tighten skin and decrease wrinkles and hooding in the eye area without surgery or injections, and little to no downtime.

Single treatment. Generally, some improvement is immediately visible and continues for up to six months.

Younger looking, more lifted eyes. Eyes look brighter. Skin feels tighter and smoother.

No more tired looking eyes. Eyes appear more open and alert. Under eye bags are reduced.

Make-up is applied more easily. The newly smooth skin of your eyelids makes it easier to apply eye shadow and eye liner.

No bruising, swelling or sutures. Wear make-up and return to your regular routine after the procedure.

Like all Thermage procedures, the Thermage Eye Procedure helps improve skin tone and texture while effectively tightening and contouring skin for an overall younger appearance.
