JUVÉDERM[®] IT

**YOUR GUIDE TO REFRESHING
YOUR LOOK WITH FACIAL FILLERS**

REFRESH **IT**

You work hard and want to look sharp at the office, but sometimes your face can show signs of tiredness that you want to control.

An increasing number of men are becoming concerned about their appearance and turning to non-surgical treatments, including facial fillers, to help manage their look.

When you JUVÉDERM® IT, you can refresh specific facial features to aim for the look you want. As the world's leading brand of hyaluronic acid facial fillers,* JUVÉDERM® can help (depending on the treatment chosen):

- Smooth **lines** and **wrinkles**
- Provide lift by **restoring volume**
- Contour the **chin** and **jawline**
- Maintain a **natural look** and a **natural feel**†

**RESULTS CAN LAST
FOR UP TO 24 MONTHS,
DEPENDING ON THE
TREATMENT CHOSEN.**

* Based on healthcare professional tracking market research, from over 1000 healthcare professionals in the largest 13 aesthetic markets worldwide.

† The study describing natural looking and natural feeling results evaluated the effects of Juvéderm® VOLBELLA® over a period of 12 months.

ACHIEVE IT

When you look and feel your best, it's easier to perform at your best. Whilst there are many things you can do to improve your appearance and skin quality (exercise, a good skin-care routine, a healthy diet), some things are harder to control:

- The effects of frequent shaving on your skin
- Environmental effects such as pollution, sun exposure and stress
- Natural face shape that changes as you age
- A tired look around your eyes

Whether you feel your natural features aren't as defined as you'd like or you've just started to notice a few lines and wrinkles around your eyes — you can take action.

IDEAL LOOK

A growing number of men are pursuing treatments like facial fillers to address their concerns on appearance.

JUVÉDERM[®]IT

JUVÉDERM[®] facial fillers are injectable treatments that can shape and contour specific facial features — with results that can last for up to 24 months, depending on the treatment chosen.

JUVÉDERM[®] can add volume to specific areas of the face — lifting cheeks, smoothing lines and shaping the chin and jawline.

Many **JUVÉDERM[®]** facial fillers include lidocaine which can help reduce discomfort during the procedure. The range is designed to treat different areas of the face, and visible results can be seen shortly after treatment.

JUVÉDERM[®] facial fillers may cause side effects, so it is important to discuss this with your healthcare practitioner to help you decide if JUVÉDERM[®] is right for you.

A NATURAL LOOK AND FEEL

To help keep you looking like you, whether you're smiling, laughing or frowning, our patented technology allows JUVÉDERM[®] to integrate into the tissue under the skin.

During consultation, your healthcare practitioner will check your face whilst it's still (static) and moving (dynamic) with the aim of giving you a natural-looking result, whatever emotion you're feeling.

REFRESH IT

DEPENDING ON THE TREATMENT CHOSEN,
OUR FACIAL FILLERS ARE DESIGNED TO HELP:

A

Smooth lines and wrinkles around your eyes*

B

Add fullness back to your midface
for a more defined look

C

Contour your chin and jawline

A

B

C

* Reserved for specialists specifically trained in this technique who have a sound knowledge of the physiology of this particular area.

HYDRATE_{IT}

Feel comfortable in your own skin, feel your best.
But what does “good skin” really look and feel like?
According to research with healthcare professionals,
it is based on 3 main factors:[†]

TEXTURE

Skin that is hydrated and lacking in fine lines.

ELASTICITY

Skin that is firm.

COLOUR

Skin that is not pigmented or red.

Juvéderm® VOLITE™:

**JUVÉDERM®’s Skin-Quality Injectable can help
improve skin hydration for up to 9 months.***

It can be used for face and neck to:

- Improve the appearance of fine lines
- Hydrate skin
- Improve skin smoothness[‡]

**“I SAW SOME PEOPLE I HADN’T
SEEN IN A WHILE AND THEY
COMMENTED ON HOW FRESH-
FACED I WAS LOOKING.”**

JUVÉDERM® CUSTOMER, 33

* Studies evaluating Juvéderm® VOLITE™ used Juvéderm® VOLITE™ B (without lidocaine).

† In 2015, a total of 40 healthcare professionals from Canada, UK, France, Italy and Taiwan took part in research designed to evaluate skin quality.

‡ Changes in the texture of cheek skin was used to evaluate skin smoothness.

PERSONALIZE*IT*

While there may be a specific facial area you're looking to enhance, your healthcare practitioner may evaluate multiple areas to help you aim for the look you want.

WHICH IS IT?

JUVÉDERM® has a range designed to treat different areas of the face. Your healthcare practitioner will work with you to identify suitable JUVÉDERM® treatments for you.

GET IT RIGHT

Your goals, your plan. Your healthcare practitioner can help create a personal treatment plan, based on your individual goals, and advise you on the JUVÉDERM® treatments that can help you achieve the results you're aiming for.

of patients* reported being “delighted” or “happy” immediately after treatment with Juvéderm® VOLUMA®, part of the JUVÉDERM® range of products.

ASK IT

You frequently ask it. We answer it. Talk to your healthcare practitioner for more guidance and advice on aftercare, as well as further information on the questions below.

Q. How soon can I return to my normal routine?

- A. You may experience redness or swelling after treatment. However, many people can return to their normal routine on the day they are treated, depending on treatment received.

Q. Are there any Dos and Don'ts?

- A. Your healthcare practitioner may advise avoiding things like extended periods in the sun, saunas, UV rays or very cold temperatures, for a while.

Q. Should I book a follow-up treatment?

- A. Your healthcare practitioner will advise on how to maintain your results. They may suggest a follow-up appointment after treatment.

62%

of patients* returned to their normal routine on the same day as their treatment with Juvéderm® VOLBELLA®, part of the JUVÉDERM® range of products.

* 38 out of a study of 61 patients asked.

WHY JUVÉDERM[®] IT?

The world's leading brand of hyaluronic acid facial fillers.*

Allergan supports clinical practice by offering training to healthcare practitioners.

Results that can look and feel natural.

SAFETY INFORMATION

JUVÉDERM® indications

JUVÉDERM® is a family of injectable implant products intended to smooth lines and wrinkles, enhance lips, treat perioral lines and oral commissures and restore lost volume to the cheeks and jawline.

JUVÉDERM® safety information

Your physician will ask about your medical history to determine if JUVÉDERM® products are appropriate for you. Tell your practitioner if you have:

- Severe allergies with a history of anaphylaxis, multiple severe allergies, allergies to hyaluronic acid or other filler products, or allergies to lidocaine or other local anesthetics.
- A history of autoimmune disease, recurrent sore throats, rheumatic fever, epilepsy, or porphyria.

The following are important treatment considerations for you to discuss with your practitioner before treatment in order to help avoid unsatisfactory results and complications:

- You are currently taking medications which prolong bleeding, such as acetylsalicylic acid (aspirin), non-steroidal anti-inflammatory drugs, or anticoagulants, as with any injection, you may experience prolonged bleeding. You should inform your practitioner about any medications you are currently taking.
- You have recently had other skin surface treatments (such as laser treatment, skin peels or dermabrasion) or have previously used fillers.
- You have skin infections or inflammation such as acne or cold sores.
- You scar frequently.
- You are pregnant or breastfeeding, or you are under the age of 18 years (under the age of 21 years if treating the lips), as the safety of JUVÉDERM® products has not been established.

Potential side effects associated with JUVÉDERM® products include temporary injection-site reactions such as redness, swelling, itching, pain, firmness, bumps, bruising and discolouration. These reactions may occur immediately or may be delayed and may last for up to a week. Injections in the lips may cause more swelling and bruising due to the unique physiology of this area. As with any injection, there is a risk of infection. This is not a complete list of side effects. If inflammatory reactions persist for more than one week, or if any other side effects develop, seek medical attention as soon as possible.
